(Tasking data sheet attached)

Summary: Site is composed of a large tract of land and numerous
structures, some quite large. (A strong AOL of "gantry and
rocket" was present at the beginning of the session). The whole
place has the feel of a (A/S) "defense plant".

The target structure (object?) is horizontal, long,
cylindrical/squat/"pod-like" with "ribs" (like a grub) [See
sketch p.13]. I have not yet determined whether the ends are
closed or open, however the impression is present that something
can/should pass through it; (AOL-"test/diagnostics chamber").

[Comment: A tough target due to its proximity to more vertical,
larger structures].
